Project 2: Debugging

Due date: November 4th at 11:59 PM

Link to Slides: [Lecture 2: debugging](#)

1 | About the Project

This is the opportunity to put into practice the debugging strategies learned in lecture. There will be two circuits for you to debug, one on a perfboard and another on a breadboard.

2 | Parts Needed

- NA, come to the lab ;)

3 | How to Approach

Visit IEEE during working hours and ask for 2 circuits for you to debug
   a. Perfboard
      i. Tell the officer what is wrong with the circuit
   b. Breadboard
      i. Fix it yourself until there are no more errors

4 | Deliverables

The project is completed when you successfully debug the circuits and can explain your steps.
